

AUREC Acceptance and Delivery Conditions

Packing Requirements Big Bag

(As of: 1st January, 2023)

The type of packaging is specified as part of the approval process. In the case of dangerous goods, the packaging must meet the ADR specifications and be labeled in accordance with GefStoffV or EC regulation number 1272/2008 (CLP).

Properties

- four lifting loops in the corners
- closed bottom shape (no bottom opening)
- demonstrably approved for use underground: flame retardant, antistatic, harmless in terms of mining hygiene
- dustproof, e.g. with seam sealing
- single-layer fabric, without inner bag and outlet opening
- specifications for the design are made as part of the verification/notification procedure

Filling

- filling without overhanging the basic dimensions of the pallet
- only for bulk goods without pointed, sharp-edged or coarse-grained components
- gross weight according to approval, but no more than 1,500 kg
- total height including flower: max. 1.60 m
- filled big bags must be dimensionally stable and stackable

Labeling

- permanent labeling with approval and EWC number on opposite sides
- font height at least 10 cm
- visible on the sides that the forklift picks up
- labeling according to ADR and GefStoffV

Pallets

- basic dimensions: 850 cm x 800 cm
- can be picked up with a forklift
- closed planking
